

Name: Jaladi Deepika

Java function for adding two numbers using functions

**Code:**

```
public class Main {  
    static int function(int x, int y) {  
        return x + y;  
    }  
  
    public static void main(String[] args) {  
        System.out.println(function(7, 3));  
    }  
}
```

**Output:**

10
